LHS Participates in State Science Day

by Robert Krawitz

On Saturday, May 9, eighteen students from the high school traveled to Fairleigh Dickinson University to compete in State Science Day.

This is a statewide competition in chemistry, physics, and biology. The contest lasted one and one-half hours and consisted of a series of multiple choice questions designed to test the contestants' knowledge in one of these sciences.

The participants on the Chemistry team were Shiva Ayyadurai, Arthur Greenspan, Robert Krawitz, Holly Kulka, Peggy Kuo, and Peter Margolis. On the Physics team were Kow Yan Hoo, Jeff Horing, Richard Margolin, Mark Schaeffer, David Steinman, and Neil Weinstock. The Biology team consisted of Dante Centuori, Craig Cooper-smith, Eric Gerson, Justin Peyser, Patricia Safran and Karen Ziemke.

The results have not yet been learned, so no one knows how well he did relative to anyone else. Rankings will eventually be given for individual performance, team standing, i.e., Livingston's Biology team versus other Biology teams, and overall school record in the competition.
